DOUBLE CAVITY WITH VISUAL SPACER

DOUBLE CAVITY WITH HIDDEN SPACER

VISUAL SPACER

Standard panel widths can be used with a visual cavity spacer.

HIDDEN SPACER

If overlaying panels to hide the cavity spacer, allow for extra panel width.

To calculate the total cavity width for installing different models:

Add the widths of each panel for dual or triple installations.

Add 1/8 inch (3mm) for every gap between the appliances and the gaps between the appliances and the cabinet walls.

The thickness of the custom door panel can vary provided that the screws do not penetrate beyond the full depth of the door panel.

Cut-outs in the hanging bracket are applicable for Fisher and Paykel handles only.

If locating a custom handle in the shaded area shown above, ensure handle screw heads are countersunk into the back of the door panel to avoid interference with the hanging bracket.

10x Pilot holes recommended for bracket attachment. (Do not penetrate front surface).

Ensure handle is mounted 65mm from edge of panel to the centre—this will avoid interference with bracket.
